PREFACE

The data for *Adolescent Outcome of Physically Abused Schoolchildren*, have been given to the National Data Archive on Child Abuse and Neglect for public distribution by Suzanne Salzinger, Richard Feldman, and Daisy S. Ng-Mak. Funding for the project was provided by National Institute of Mental Health (Award Number: R01 MH048917 05-08).

ACKNOWLEDGEMENT OF SOURCE

Authors should acknowledge the National Data Archive on Child Abuse and Neglect and the original collector of the data when they publish manuscripts that use data provided by the Archive. Users of these data are urged to follow some adaptation of the statement below.

> The data used in this publication were made available by the National Data Archive on Child Abuse and Neglect, Cornell University, Ithaca, NY, and have been used with permission. Data from *Adolescent Outcome of Physically Abused Schoolchildren* were originally collected by Suzanne Salzinger, Richard Feldman, and Daisy S. Ng-Mak. Funding for the project was provided by the National Institute of Mental Health (Award Number: R01 MH048917 05-08). The collector of the original data, the funder, NDACAN, Cornell University and their agents or employees bear no responsibility for the analyses or interpretations presented here.

The bibliographic citation for this data collection is:

> Salzinger, S., Feldman, R., & Ng-Mak, D. (2008). *Adolescent Outcome of Physically Abused Schoolchildren [Dataset]*. Available from National Data Archive on Child Abuse and Neglect Web site, http://www.ndacan.cornell.edu

PUBLICATION SUBMISSION REQUIREMENT

In accordance with the terms of the *Data License* for this dataset, users of these data are required to deposit a copy of any published work or report based wholly or in part on these data with the Archive. A copy of any completed manuscript, thesis abstract, or reprint should be sent to the National Data Archive on Child Abuse and Neglect, Cornell University, Family Life Development Center, Beebe Hall, Ithaca, New York 14853. Such copies will be used to provide funding agencies with essential information about the use of NDACAN resources and to facilitate the exchange of information about research activities among data users and contributors.

_____

ABSTRACT

This study is designed to assess the outcomes in mid to late adolescence of preadolescent physically abused and matched non-maltreated children first studied at ages 9-12 years. The outcome domains were Externalizing Problem Behavior, Internalizing Problems and Emotional Disorder, Quality of Personal Relationships, Risk Behavior, and Aggression/Delinquency. For each, a model was proposed in which the path from preadolescent physical abuse to outcome is examined with respect to three classes of mediating variables hypothesized to protect against or exacerbate the effects of the abuse. These classes of mediators, comprised of variables chosen on the basis of the contributors' previous abuse studies and other data in the child development literature, were all measured in preadolescence. They are conceptualized as individual (e.g., behavior problems, social behavior, social cognition), interpersonal (e.g., social status among peers, attachment, parenting), and contextual (e.g., family adversity, maternal psychopathology). Each model is retested with preadolescent exposure to family violence and parental perceptions of community violence added to child abuse as the causal variable.

The children studied as adolescents were re-recruited from the 100 confirmed cases of physical abuse first recruited when they were preadolescents from the NYC Child Welfare Administration Register and 100 non-maltreated classmates matched case by case for gender, age, ethnicity, and SES. They were assessed in preadolescence by means of classroom sociometry and peer behavior ratings, by individual child interviews, by teacher and parent ratings of behavior, and by parent interviews and questionnaires on family demographics, adversity, family conflict, including domestic violence, and on parenting discipline practices. The assessments of outcomes, as close as possible to age 17, were carried out by means of adolescent interviews and questionnaires, teacher and parent ratings, parent interviews and questionnaires, and an interview and questionnaire administered to a best friend of each adolescent.

Preliminary results show that the abused adolescents continue to be at higher risk than controls for a variety of poor outcomes such as behavior problems, depression, delinquency, and some high-risk behaviors. It also appears that they are more likely to be exposed to family violence in adolescence.

Not all abused children have poor outcomes, but as a group, they are demonstrably at risk. This study's main purpose was to identify some important factors influencing the path from preadolescent abuse to adolescent outcomes and thereby to target possible points where intervention in childhood might avert some of abuse's costly individual and societal consequences.

Purpose of the Study

This study is designed to assess the outcomes in mid to late adolescence of preadolescent physically abused and matched non-maltreated children first studied at ages 9-12 years. The study's main purpose was to identify some important factors influencing the path from preadolescent abuse to adolescent outcome and thereby to target possible points where intervention in childhood might avert some of abuse's costly individual and societal consequences.

Study Design

The study reported here is a follow-up of an earlier study by the same investigators entitled Social Relationships of Physically Abused Schoolchildren, archived at NDACAN (DS_112). This study like the previous one, used a matched-comparison design. The non-abused group was matched to the physically abused group on the following characteristics: classmates, gender, age, race, ethnicity, and socioeconomic status. The data are a follow-up to data collected on the same subjects in the earlier study. The linking variables listed in the Analytic Considerations section of this User's Guide are the same as those used for DS_112.

Date(s) of Data Collection

September 1, 1997 to September 30, 2002

_____

Geographic Area

The four urban boroughs of New York City (Brooklyn, Bronx, Manhattan, and Queens)

Unit of Observation

Individual adolescent, adolescent friend, and adult (parent and teacher)

Sample

All abused and control families in the original study (Social Relationships of Physically Abused Schoolchildren) were eligible to be enrolled in the follow-up study. See dataset #112 for a complete description of the original sample.

The original preadolescent abuse sample were all confirmed cases of physical abuse consecutively registered on the maltreatment register of New York City. During the follow-up phase of the study, 153 of the original 200 families were located and tested. Of the families lost to follow up, 21 abuse families and 15 control families were unable to be located. Many had moved without leaving forwarding addresses; the post office returned mail undelivered and telephones were disconnected. Three abuse families and 7 control families refused to rejoin the study. One hundred and sixteen of the families successfully re-recruited belong to the original matched abuse/control pairs (N = 58 pairs), 17 are abuse families with no matched control family, and 20 are control families with no matched abuse family, indicating that there was no differential loss of abuse vs. control families at follow-up. Sixty-one percent of the follow-up sample are male and 39% are female, compared with 65% male and 35% females in the original sample. With respect to ethnicity, the follow-up sample is 38% Black, 7% White, 54% Hispanic, and 2% Other, compared to the original sample of 47%, 7%, 43%, and 3%, respectively. Comparison of the retained sample to the adolescents lost-to-follow-up, show that more boys were lost and that the lost sample was rated as more aggressive by parents, teachers and peers when the children were first studied in pre-adolescence.

Data Collection Procedures

All the adolescent subjects have been assessed with respect to four outcome domains: Externalizing Problem Behavior; Internalizing Problems and Emotional Disorder; Quality of Personal Relationships; and Academic Functioning. The proposed assessments of outcome, as close as possible to age 17, were carried out by means of adolescent interviews and questionnaires, teacher and parent ratings, parent interviews and questionnaires, and an interview and questionnaire administered to a best friend of each adolescent.

For the follow-up study, preadolescent and adolescent exposure to family violence and adolescent exposure to community violence have been added to preadolescent physical child abuse as causal variables.

All the data have been collected and have been entered into a computerized database and cleaned.

_____

Response Rates

The sampling pool consisted of the 200 families studied when the children were preadolescents. 153 families were able to be re-recruited, resulting in a retention rate of 76.5%. Three abuse families and 7 control families refused to rejoin the study. The remainder of families could not be located. Data from all guardians and adolescents in families re-recruited is complete. There is less than complete data from adolescents' friends and teachers.

Sources of Information

In-person interview, self-report questionnaires, and behavior ratings

Type of Data Collected

Survey, clinical, self-report questionnaires, and interviews

Measures

ACHENBACH CHILD BEHAVIOR CHECKLIST/4-18 (CBCL)
ACHENBACH TEACHER REPORT FORM (TRF)
ACHENBACH YOUTH SELF REPORT (YSR)

Achenbach, T. M. (1991a). *Manual for the teacher's report form and 1991 profile*. Burlington, VT: University of Vermont, Department of Psychiatry.

Achenbach, T. M. (1991b). *Manual for the youth self report and 1991 profile*. Burlington, VT: University of Vermont, Department of Psychiatry.

Achenbach, T. M. (1991c). *Manual for the child behavior checklist/4-18 and 1991 profile*. Burlington, VT: University of Vermont, Department of Psychiatry.

The CBCL/4-16 was the first of what has become a multiaxial empirically based set of measures for assessing children from parent-, teacher-, and self-reports. In 1991, The CBCL/4-16 was re-normed to include children up to 18 years of age (becoming CBCL/4-18), and eight cross-informant constructs were identified to facilitate direct comparison between problem behavior scores on the CBCL, the Teacher Report Form (TRF), and the Youth Self-Report Form (YSR) (Achenbach, 1991a). All three instruments include measurement of the following eight constructs or syndromes: Social Withdrawal, Somatic Complaints, Anxiety/Depression, Social Problems, Thought Problems, Attention Problems, Delinquent Behavior, and Aggressive Behavior. The CBCL is the only measure that contains the Sex Problems scale. In addition to focusing on a child's behavior as defined by one of the eight syndrome scales, the CBCL, TRF, and YSR also allow the examination of two broad groupings of syndromes: Internalizing Problems and Externalizing problems. Internalizing Problems combines the Social Withdrawal, Somatic Complaints, and Anxiety/Depression scales, while Externalizing combines the Delinquent Behavior and Aggressive Behavior scales. The three corollary instruments also contain sections addressing the area of social competence in order to determine which reported competencies discriminate between those children who are adapting successfully and those who are not. The CBCL/4-

_____

_____

18 contains 20 competence items grouped into 3 scales: Activities, Social, and School.

Construct measured: Problem behavior
Appropriate instrument was administered to the teacher, target adolescent, and guardian. Cross-informant parent, teacher, and self Total and T-scores for the subscales and for the two broad-based scales - Externalizing Problems and Internalizing Problems - were obtained. Achenbach's rating scales are widely used with children and adolescents, and their psychometric properties are well-studied.

ADOLESCENT STRESSFUL LIFE EVENTS (ASLE) - a modified version of the Life Events Checklist

Johnson, J. H., & McCutcheon, S. M. (1980). Assessing life stress in older children and adolescents: Preliminary findings with the life events checklist. *Stress and Anxiety, 7(1),* 111-126.

According to Johnson and McCutcheon (1980):
The present version of the Life Events Checklist (LEC) contains a total of 46 items (plus four spaces for indicating significant events experienced but not listed on the scale). ...the format of the present scale calls for subjects to indicate (a) those events experienced during the past year, (b) whether they would rate the event as "good" or "bad," and finally (c) the degree to which each event has had an impact on their lives. Impact ratings are on a 4-point scale: no effect = 0, some effect = 1, moderate effect = 2, and great effect = 3. Summing the ratings of those experienced events judged to be positive yields a positive change score. Summing the ratings of those events experiences as negative provides a negative change score. (p. 114)
The LEC is unique in separating assessment of positive and negative change (Johnson & McCutcheon).

Construct Measured: Stress
The contributors modified the instrument in order to focus it exclusively on stressful life events and to shorten it. The checklist was shortened from 47 to 19 items. Positive events were excluded. Items inappropriate to New York City children were excluded (e.g., getting a car). Some events were combined (e.g. trouble with the law and going to jail were combined into a single item). The instrument was scored as described above and administered to the target adolescent.

CENTER FOR EPIDEMIOLOGICAL STUDIES DEPRESSION SCALE (CES-D)

Radloff, R., & Sawyer, L. (1971). *Center for epidemiological studies depression scale (CES-D).* Rockville, MD: Center for Epidemiologic Studies, National Institute of Mental Health.

The CES-D Is a 20 item self-report scale. It was developed to be appropriate for use in studies of the epidemiology of depressive symptomatology in the general population, including depressive mood, psychomotor retardation, loss of appetite, and sleep disturbance. It does not discriminate among sub-types of depression. (Friends National Resource Center for Community Based Child Abuse Prevention)

Construct Measured: Guardian depression; Adolescent depression
The instrument was administered to both the target adolescent and to the adolescent's guardian.

_____

_____

CONFLICT TACTICS SCALES - PARENT CHILD (CTS)

Straus, M., Hamby, S., Finkelhor, D., Moore, D., & Runyan, D. (1998). *Conflict tactics scales parent child (CTSPC)*. Durham, NH: University of New Hampshire, Family Research Laboratory.

The instrument was developed to measure parental maltreatment of children. "The CTSPC has scales to measure physical assault (with subscales for corporal punishment and physical abuse), psychological aggression, and use of nonviolent discipline techniques. There are also supplementary questions on neglect; sexual abuse, and discipline in the past week" (Straus, 2007).

Construct measured: Abuse/maltreatment
The instrument was administered to the parent as a screen for abuse of adolescents since reaching high school or age 14.

DIAGNOSTIC INTERVIEW OF CHILDREN AND ADOLESCENTS - PTSD SECTION (DICA)

Reich, W., Welner, Z., Herjanic, B., & Multi-Health Systems Inc. (1995). *Posttraumatic stress disorder section. Diagnostic interview for children and adolescents (DICA) [software for computer aided assessment, version 8.0]*. Newbury, Berkshire, UK: Multi-Health Systems Inc.

This revision of the DICA assesses both DSM-III-R and DSM-IV diagnostic criteria, is less highly structured than earlier versions (interviewers may ask additional questions to clarify responses), and includes questions regarding severity of impairment (Shaffer, Fisher, Lucas, Dulcan, & Schwab-Stone, 2000). Items are scored on a 4-point scale (no, rarely, sometimes or somewhat, and yes). Responses can be used to construct DSM-compatible symptom or criterion scales.

Construct measured: Post-traumatic stress symptoms
Instrument was administered to the target adolescent. The "Adolescent" version for youth over age 12 was used. Instrument includes one additional variable about 9/11.

FAMILY EVENTS INTERVIEW (FEI)

Salzinger, S., Feldman, R., & Ng-Mak, D. (1993). *Family events interview*. Unpublished instrument. New York: New York State Psychiatric Institute.

Construct measured: Family life events
The contributors developed this data collection instrument administered to the adolescent's parent. It includes separation and divorce, homelessness, chronic illness, mental illness, alcohol, drugs, jail, assault, miscarriage or abortion, recent illness, accident, police contact in past year, fired or lost job, deaths, and pleasant events.

GUARDIAN DEMOGRAPHICS INTERVIEW (GDI)

Salzinger, S., Feldman, R., & Ng-Mak, D. (1993). *Guardian demographics interview*. Unpublished instrument. New York: New York State Psychiatric Institute.

_____

Construct measured: Demographics, Family structure, Home safety, Neighborhood safety, and Physical condition of the home

The contributors developed a data collection instrument for family demographics. It includes household composition, household's regular contact with non-household members since adolescent started high school, adolescent household moves since beginning high school, education and occupation of parents, welfare status of parents, occupational status of parents, ethnicity/race, country of origin of parents, language of parents, guardian's religion, physical condition of home, and parent perception of safety of home and neighborhood.

INTERPERSONAL COMPETENCE SCALE - TEACHER (ICSg, ICSt, ICSf)

Cairns, R. B., Leung, M., Gest, S. D., & Cairns, B. D. (1995). A brief method for assessing social development: Structure, reliability, stability, and developmental validity of the interpersonal competence scale. *Behaviour Research and Therapy, 33(6)*, 725-736.

According to Cairns, Leung, Gest, and Cairns (1995):

The Interpersonal Competence Scale (ICS-T) is a set of brief rating scales for teachers and parents. It consists of 18 items that assess social and behavioral characteristics of children and youths. The ICS-T yields three primary factors: AGG (argues, trouble at school, fights), POP (popular with boys, popular with girls, lots of friends), and ACA (spelling, math). Subsidiary factors include AFF (smile, friendly), OLY (appearance, sports, wins), and INT (shyness, sad, worry). The psychometric properties of the scale (internal structure, reliability, long-term stability) are presented and evaluated over successive ages. The scale factors have been linked to contemporaneous observations of behavior and social network membership. Developmental validity of the ICS-T includes the significant prediction of later school dropout and teenage parenthood. (abstract)

Construct measured: Adolescent's interpersonal competence

Measure administered to parent, peer, and adolescent.

INVENTORY OF PARENT AND PEER ATTACHMENT (IPPA)

Armsden, G., & Greenberg, M. (1987). *Inventory of parent and peer attachment (IPPA)*. Princeton, NJ: Educational Testing Service.

The IPPA was developed to assess perceptions of relationships with their parents and close friends, and how well the parents and friends provide psychological security. The measure consists of 25 parent items and 25 friend items rated for frequency on a 5-point Likert response scale. Factor analysis identified three factors for both parent and peer attachment: trust, communication, and alienation. Internal consistency for these factors ranged from .72 to .91. Psychometric properties were established on older adolescents and college students, ages 16 to 21 years.

Construct Measured: Adolescent-parent attachment; Adolescent-peer attachment

_____

MARLOWE-CROWNE SOCIAL DESIRABILITY SCALE (SDS)

Crowne, D., & Marlowe, D. (1964). *Marlowe-Crowne social desirability scale*. Westport, CT:
    Greenwood Press.

This instrument is designed to measure individual differences in social-desirability responses. It
conceptualizes social desirability as the need for approval of an individual. It is a 33 item, true-false
survey of acceptable and undesirable statements.

Construct measured: Social desirability
Instrument was administered to the adolescent.

PERSONAL RELATIONSHIPS INSTRUMENT (PRI)

Salzinger, S., Feldman, R., Hammer, M., & Rosario, M. (1992). *Personal relationships instrument.*
    Unpublished instrument. New York: New York State Psychiatric Institute.

Salzinger, S., Rosario, M., & Feldman, R. S. (2007). Physical child abuse and adolescent violent
    delinquency: The mediating and moderating roles of personal relationships. *Child Maltreatment,
    12(3)*, 208-219. doi: http://dx.doi.org/10.1177/1077559507301839

Construct measured: Serious disagreements
This is a contributor-created data collection instrument administered to the target adolescent. It includes
adolescent's reports of disagreements or fights between the adolescent and best friend, between the
adolescent and a romantic partner, and between the adolescent and parents. The information is coded for
most serious disagreements, the frequency with which they involve verbally or physically abusive
behavior, severity, and who were the targets and perpetrators.

SELF-REPORTED DELINQUENCY MEASURE (SRD, SRDf, RFD)

Elliott, D. S., & Aguirre, A. M. (1980). Reconciling race and class differences in self-reported and
    official estimates of delinquency. *American Sociological Review, 45(1)*, 95-110. Retrieved from
    http://search.ebscohost.com/login.aspx?direct=true&db=sih&AN=14846907&site=ehost-live

This measure was first used in the 1977 National Youth Survey of 1726 youths age 11 to 17. It consists
of 47 items representing all acts involving more than 1% of reported juvenile arrests in the Uniform
Crime Reports for 1972-1974. It is administered as an interview, and is comprehensive, including 6
types of crimes: 1) predatory crimes against persons, 2) predatory crimes against property, 3) illegal
service crimes, 4) public disorder crimes, 5) status crimes, and 6) hard drug use. It continues to be used
in representative national youth surveys (Huizinga, Loeber, & Thornberry, 1993).

Construct measured: Adolescent's delinquent and criminal behaviors; Friend's delinquent and criminal
behaviors
This instrument was administered to the adolescent and to a friend of the adolescent. A modified
version of the SRD was administered to the target adolescent reporting friend's delinquency (RFD).
The modification was that the scale for report of friend's delinquency was dichotomous rather than

_____

_____

Likert and four additional questions were added.

SOCIAL NETWORK INTERVIEW (SNIt, SNIf)

Salzinger, S. (1990). *Social network interview*. Unpublished instrument. New York: New York State
      Psychiatric Institute.

Construct measured: Peer and family network composition and characteristics
This contributor-created instrument was administered to adolescent and to a friend of the adolescent to
determine the composition of peer and family network and the characteristics of network members.

SURVEY OF CHILDREN'S EXPOSURE TO COMMUNITY VIOLENCE - SELF REPORT (ECV)

Richters, J. E., & Saltzman, W. (1990). *Survey of children's exposure to community violence: Self
      report*. Rockville, MD: National Institute of Mental Health.

The interview asks about frequency of exposure to the following: being chased; drug activity; serious
accidents; forced entry; arrests; threats; slapping, hitting, and punching; beatings and muggings; rape
and molestation; carrying guns and knives; serious woundings; knife attacks; dead bodies; suicides; and
killings. It determines whether the violence took place in school, in the neighborhood, or at home, and
whether family members, friends or strangers were involved. It determines whether the violence was
witnessed or experienced by the adolescent.

Construct measured: Exposure to community violence
Administered to the adolescent for exposure to violence both during and before high school. Total count
of types of exposure to school and neighborhood violence is taken as a measure of exposure to
community violence. Counts of different types of exposure to violence at home contribute to the
assessment of exposure to family violence. A question about 9/11 exposure was added for adolescents
interviewed after 9/11.

UCLA LONELINESS SCALE, REVISED (ULS)

Russell, D., Peplau, L., & Cutrona, C. (1980). Revised UCLA loneliness scale. *Journal of Personality
      and Social Psychology, 39(3)*, 472-480.

The scale consists of 20 items, each rated on a 4-point frequency scale from never to often. In the new
scale, half the items reflect satisfaction with social relationships and half reflect dissatisfaction.
Assessment of concurrent validity showed it to be negatively predicted by factor scores of affiliative
motivation and social risk-taking, and positively predicted by negative affect ($R2 = .43$). Internal
consistency is high (alpha = .94). This scale was psychometrically assessed on college students.

Construct measured: Loneliness
Scale was administered to the adolescent.

_____

YOUTH RISK BEHAVIOR SURVEY (YRBS)

Centers for Disease Control and Prevention. (1993). *Youth risk behavior survey (YRBS).* Atlanta, GA: Centers for Disease Control and Prevention.

The survey assesses adolescent risk-behavior. It is a 70-item self-report questionnaire taking 20-25 minutes to complete. The YRBS, developed and piloted by the CDC for use in national surveys, includes categories of sexual risk, aggression (fighting, carrying weapons), physical recklessness (drinking and driving/riding, seat belt and motorcycle helmet use, and swimming without a lifeguard), alcohol use (habitual and binge drinking), drug use (habitual and recent use of illegal drugs), cigarette use (frequency of smoking and daily number of cigarettes), lack of exercise (frequency of regular hard and light exercise), and suicidal behavior.

Construct measured: Risk-behavior
Instrument administered to the adolescent.

Analytic Considerations

One summary data file, DS_117, was created by NDACAN by matching SID across datasets to merge chosen demographic and summary variables.

The data are a follow-up to data on the same subjects collected in an earlier study (DS_112).

All defined missing values from the contributor data files have been reclassified to system missing in the summary data file DS_117. The original missing values and their labels appear in the contributor data files. Please note that at times the missing values may be within the range of valid values. The contributor has confirmed that in using these data files all declared missing values should be treated as missing. In the summary data file, DS_117, some of the value labels (e.g. 88=NA, or 99=DK) still persist but are not in use. All missing values have been changed to system missing in this data file.

Some recodes and manual changes have been made in the working file DS_117, that were not made in the contributor original data files. In cases of discrepancy between DS_117 and another file, DS_117 is the newest and most correct version of the data. If necessary, use of contributor data files should be done only with consultation of the Map Connecting Files with Measures chart (found in this User's Guide), and use of contributor codebooks, contributor programs (for method of calculation of derived variables), and contributor instruments. If necessary, use of NDACAN data files should be done only with consultation of the Map Connecting Files with Measures chart, NDACAN programs (for method of calculation of derived variables), and contributor data files, codebooks, instruments, and programs. If running syntax in any program files, the pathnames will need to be changed.

The following variables can be used to link the contributor data files (Note: these linking variables also

_____

_____

apply to DS_112):

sid (5-digit subject id) - The first 3 digits comprise the case id. The fourth digit indicates abuse or control status where odd numbers are abuse subjects and even numbers are control subjects. The 5th digit refers to guardian interviewee's relationship to child.

cid (3-digit case/class id) - Each case consists of an abuse and control pair of subjects.

abcon - Abuse or control subject where odd numbers indicate abuse and even numbers indicate control.

abusedk - Abuse or control subject where abuse is 1 and control is 0.

Note: cid plus abusedk defines matched abused or control subject within each case.

Confidentiality Protection

The contributor has removed all primary identifiers from the data.

Extent of Collection

This collection consists of the NDACAN User's Guide and Codebook, one labeled and complete summary data file (DS_117) with import statements for SPSS and SAS and a Stata native file, 9 NDACAN developed data files (created for incorporation into DS_117), 12 NDACAN developed SPSS program files (that provide syntax for derived variables and code for creation of DS_117), 26 contributor data files with import statements for SPSS and SAS and Stata native files, 228 individual subject SAS contributor data files, 25 contributor codebooks, 22 contributor instruments, 53 contributor developed SPSS and SAS program files, and a contributor final report.

Extent of Processing

NDACAN produced the User's Guide and Codebook and created a single data file, titled DS_117, which contains demographic information and summary variables from the original data files. NDACAN added variable and value labels to DS_117. NDACAN created program files and data files to derive summary variables and to create DS_117. All defined missing values were changed to system missing in DS_117. NDACAN formatted all contributor instruments and code books. For all contributor original files, labels are provided in the contributor codebooks. Errors encountered during processing were recoded with approval of contributor; See NDACAN notes in the syntax program files for further explanation.

DATA FILE INFORMATION

<u>File Specifications</u>

All data in this collection have a rectangular file structure. DS_117 is fully labeled. All other data files are partially labeled, and the user will need to fill in the missing label information using a combination of the Map Connecting Files with Measures (below), Contributor Codebooks, Contributor Instrument Files, and Contributor Program Files.

No.	File Name	Number of Records in Data File	Variable Count	Records Per Respondent
29	DS_117 (Summary File)	153	833	1
1	demgfl	153	297	1
2	fefl	153	352	1
3	ctsfl2	153	123	1
4	pachfl	152	60	1
5	depgfl	153	48	1
6	icsgfl	153	42	1
7	demsfl	153	91	1
8	lefl	153	80	1
9	yrbfl	153	131	1

_____

Map Connecting Files with Measures

This table links the measures administered in the study to the corresponding instrument, codebook, program, and data files. It also explains what values from the contributor files are included in the summary file DS_117. All NDACAN data and program files are italicized. All files in plain text are contributor files.

Respondent	Measure Name	Construct Measured	Instrument File(s)	Codebook File(s)	Program File(s)	Data File(s)	Summary Data File DS_117
Guardian is the respondent.	**Guardian Demographics Interview** (GDI)	Demographics, Family structure, Home safety, Neighborhood safety, & Physical condition of the home	01demographic follow-up.pdf	01demfl code book.pdf, 00codshe.fl.pdf	**demgfl1.sps**- sets up SPSS database, value labels are defined, missing values are declared **demgfl2.sps** – runs frequencies, corrects data file, creates new variables	**demgfl-**includes all variables in codebook plus some created variables, includes value labels and some variable labels	EXCLUDED variables: coder, card, inst, demfl2, demfl2d, demfl2m, demfl2y, demfl6, demfl8, demfl9 INCLUDED variables: all other variables
	Family Events Instrument (FEI)	Family life events	02fefl.ins.pdf	02fefl code book.pdf	**fefl1.sps** – Sets up SPSS database, value labels are defined, missing values are declared **fefl2.sps** - runs frequencies, corrects data file *feflCorrectionAge.sps – recalculates age variable following manual change to data file*	**fefl** - includes all variables in codebook, has numeric variable names, no variable labels, has value labels, has no summary variables, and includes pleasant events *feflCorrection.sav - updated file*	EXCLUDED variables: code, card, inst, fefl2, fefl2m, fefl2d, fefl2, fefl3, fefl4, fefl5, fefl5m, fefl5d, fefl5y, fefl6, fefl7, fefl8, fefl9, age EXCLUDED because missing for all cases: fefl22-fefl43, fefl109-fefl148, fefl190-fefl209, fefl246-felf257, fefl265-fefl270, fefl325-fefl334 INCLUDED variables: all other variables
	Conflict Tactics Scale (CTS) **caregiver to child**	Abuse /maltreatment	03 Conflict Tactics Scale follow-up.pdf	03ctsfl code book.pdf	**ctsfl1.sps** - sets up SPSS database, missing values are declared and value labels are defined **ctsfl2.sps** - runs frequencies, corrects data file, and creates summary variables **ctsflSyntax1.sps, ctsflSyntax2.sps, ctsSyntax3.sps, ctsflSyntax4.sps, ctsflSyntax5.sps, and ctsflSyntax6.sps** - computes mean frequencies for 6 summary variables	**ctsfl2 -** includes all variables in codebook plus some created aggregated variables, has value labels	INCLUDED variables:12 summary scores EXCLUDED variables: All other variables

Respondent	Measure Name	Construct Measured	Instrument File(s)	Codebook File(s)	Program File(s)	Data File(s)	Summary Data File DS_117
Guardian is the respondent.	Achenbach Parent-rated Child Behavioral Checklist (CBCL)	Problem behavior	Achenbach's CBCL rating forms (not	Achenbach's Cross-Informant Program for Coding (not provided)	**pachfl1.sps** –sets up SPSS database, missing values are declared and variable labels and value labels are defined	**pachfl** - includes variable labels, includes total scores, t-scores, clinical scores for subscales and broadband categories such as total problems and internalizing and externalizing scales	EXCLUDED variables: code, gender, age INCLUDED variables: All other variables, which are summary scores
	Center for Epidemiologic Studies Depression Scale by guardian (CES-Dg)	Guardian depression	05depgfl.ins.pdf	05depgfl code book.pdf	**depgfl1.sps** - sets up SPSS database, missing values are declared and value labels are defined **depgfl2.sps** - runs frequencies, recodes some variables, creates summary mean depression score	**depgfl** - includes all variables in codebook, some reverse-coded variables, and the created summary Mean Guardian Depression score	INCLUDED variable:1 summary score EXCLUDED variables: all other variables
	Interpersonal Competence Scale rated by guardian (ICSg)	Adolescent's interpersonal competence	06icsgfl.ins.pdf	06icsgfl code book.pdf	**icsgfl1.sps**- sets up SPSS database, missing values are declared and some value labels are defined **icsgfl2.sps** -computes frequencies *icsgflScores.sps – computes scores*	**icsgfl** - includes all variables in codebook, includes value labels *icsgflScores.sav - ICSg scores*	INCLUDED variables:8 summary scores EXCLUDED variables: all other variables
Target adolescent is the respondent.	Adolescent Demographics Instrument (ADI)	Demographics, Job stress, Future expectations, & Places adolescent lived	07demsfl.ins.pdf	07demsfl code book.pdf	**demsfl1.sps** –sets up SPSS database, missing values are declared, variable labels are defined and value labels are defined **demsfl2.sps** -computes frequencies and creates variables (includes the rationale for ethnic group classification)	**demsfl** - includes all variables in codebook and some created summary variables, includes variable labels and value labels	EXCLUDED variables: card, inst, demsfl2, demsfl2m, demsfl2d, demsfl2y, demsfl3, demsfl4, demsfl5, demsfl5m, demsfl5d, demsfl5y, demsfl6 ,demsfl7, demsfl8, demsfl9, age, demsfl42r, demsfl59, demsfl60, demsfl61, demsfl62, demsfl6, demsfl64, demsfl65, demsfl66, demsfl67, demsfl68, demsfl69, demsfl70, demsfl71, demsfl72, demsfl73, demsfl74, demsfl75 INCLUDED variables: all other variables

Respondent	Measure Name	Construct Measured	Instrument File(s)	Codebook File(s)	Program File(s)	Data File(s)	Summary Data File DS_117
Target adolescent is the respondent.	**Adolescent Stressful Life Events** (ASLE) a modified version of the Life Events Checklist	Stress	08lefl.ins.pdf	08lefl code book.pdf	**lefl1.sps** - sets up SPSS database, missing values are declared and value labels are defined **lefl2.sps** - computes frequencies, labels variables, and creates summary variable	**lefl** - includes all variables in codebook, variable labels, value labels, and summary variable	INCLUDED variable: 1 summary score EXCLUDED variables: all other variables
	Youth Risk Behavior Survey (YRBS)	Risk-behavior	09yrbsfl.ins.pdf	09yrbfl code book.pdf	**yrbfl1.sps** - sets up SPSS database, missing values are declared and value labels are defined **yrbfl2.sps** - computes frequencies, recodes some variables and creates summary variables for various types of risk behaviors *yrbflCorrectionSuicideVar.sps* – corrects suicide summary score following change (correction) of several data points per contributor	**yrbfl** - includes all variables in codebook plus some summary variables, includes variable labels and values *yrbflCorrection.sav* – *updated file*	INCLUDED variables: 5 summary scores EXCLUDED variables: all other variables
	Self Report of Delinquency by target adolescent (SRDt)	Delinquent and criminal behavior	10srdfl.ins. pdf	10srdfl code book.pdf	**srdsfl1.sps** - sets up SPSS database, missing values are declared and value labels are defined **srdsfl2.sps** - runs frequencies, labels variables, creates summary variable	**srdsfl** - includes all variables in codebook plus a summary measure of delinquent behavior	INCLUDED variable: 1 summary score EXCLUDED variables: all other variables
	Survey of Children's Exposure to Community Violence – Self Report (ECV)	Exposure to community violence	11expfl. ins.pdf	11EXfl code book.pdf EXfl code book (2) .pdf (adds variables about 9/11)	**xfl1.sps** - sets up SPSS database, value labels are defined and missing values are declared **xfl2.sps** - runs frequencies and recodes missing values for some variables **exposure followup aggregate variables.sps** - creates aggregated continuous and dichotomous scores for victimization and witnessing violence in the home, neighborhood, school, community	**xfl** includes all variables in codebook	INCLUDED variables:22 summary scores EXCLUDED variables: all other variables

Respondent	Measure Name	Construct Measured	Instrument File(s)	Codebook File(s)	Program File(s)	Data File(s)	Summary Data File DS_117
Target adolescent is the respondent.	**PTSD section of the Diagnostic Interview for Children & Adolescents** (DICA)	Post-traumatic stress symptoms	12ptsdfl.ins.pdf	12ptsdfl code book.pdf 12ptsdfl code book (2).pdf (adds variable about 9/11)	**ptsdfl1.sps** – sets up SPSS database, missing values are declared and value labels are defined **ptsdfl2.sps** - runs frequencies *ptsdflScores.sps* – computes summary scores for the PTSD variables of the DICA	**ptsdfl** - includes all variables in codebook plus one variable about upset after 9/11, includes value labels **ptsdflScores.sav** – includes summary variables	INCLUDED variables: 5 summary variables EXCLUDED variables: all other variables
	Social Network Interview of target adolescent (SNIt)	Peer and family network composition and characteristics	13snsfl.ins.pdf	13snsfl code book.pdf, 00codshe.fl.pdf	**snsfl1.sas** - creates database for network variables separately for each target adolescent, and establishes missing data. *MVarsFilePrepSnsflabc.sps* – *calculates a count of friends and captures summary variables*	**snsflabc** - Note: There are variable lines of data for each case, reflecting the number of network members in the adolescent's network with each line representing the characteristics of a single network member. 153 individual data files are in a separate folder labeled snsfl. Each SAS file is named snsfl### where ###= subject ID. These can be used to create summary measures for each individual's network. *snsflabcSummary.sav* - *includes summary variables and a count of friends*	INCLUDED variables: 17 summary variables EXCLUDED variables: all other variables

Respondent	Measure Name	Construct Measured	Instrument File(s)	Codebook File(s)	Program File(s)	Data File(s)	Summary Data File DS_117
Target adolescent is the respondent.	**Personal Relationships Instrument** (PRI)	Serious disagreements	14prfl.ins.pdf	14prfl code book.pdf	**prfl1.sps** - sets up SPSS database, missing values are declared and value labels are defined **prfl2.sps** - runs frequencies, creates new summary variables for victims and perpetrators	**prfl** - includes all variables in codebook, value labels, and variable labels for created variables for abusive relationships with best friend, romantic partner, and parents	INCLUDED variables: 20 summary variables EXCLUDED variables: all other variables
	Inventory of Parent & Peer Attachment (IPPA)	Adolescent-parent, and adolescent-peer attachment	15attfl.ins.pdf	15attfl code book.pdf	**attfl1.sps** - sets up SPSS database, missing values are declared and value labels are defined **attfl2.sps** - runs frequencies, recodes some variables by reverse coding, and creates summary variables for attachment to parents and friends	**attfl** - includes all variables in codebook for attachment to parents and friends plus some reverse-coded items and summary variables, includes value labels	INCLUDED variables: 2 summary scores EXCLUDED variables: all other variables
	UCLA Loneliness Scale (ULS)	Loneliness	16lnfl.ins.pdf	16lnfl code book.pdf	**lnfl1.sps** - sets up SPSS database, missing values are declared and value labels are defined **lnfl2.sps** - runs frequencies *lnflScore.sps – computes summary score*	**lnfl** includes all variables in codebook and includes value labels *lnflScore.sav - Summary score*	INCLUDED variable: 1 summary score EXCLUDED variables: all other variables
	Achenbach Youth Self Report (YSR)	Problem behavior	Achenbach's YSR behavior rating form	Achenbach's Cross-Informant Program for coding (not provided)	**ysrfl1.sps** - sets up SPSS database, missing values are declared and variable labels and value labels are defined	**ysrfl** - Youth Self Report Achenbach behavior rating, includes variable labels and value labels, includes total scores, t-scores, clinical scores for subscales and broadband categories such as total problems and internalizing and externalizing scales	EXCLUDED variables: coder, gender, age INCLUDED variables: all other variables, which are summary scores

Respondent	Measure Name	Construct Measured	Instrument File(s)	Codebook File(s)	Program File(s)	Data File(s)	**Summary Data File DS_117**
Target adolescent is the respondent.	**Center for Epidemiologic Studies Depression Scale by target adolescent** (CES-Dt)	Adolescent depression	18depsfl.ins.pdf	18depsfl code book.pdf	**depsfl1.sps** - sets up SPSS database, missing values are declared and value labels are defined **depsfl2.sps** - runs frequencies, recodes some variables and creates summary variable for mean depression	**depsfl** - includes all variables in codebook plus some reverse-coded variables plus created summary variable, includes value labels and some variable labels	INCLUDED variable: 1 summary score EXCLUDED variables: all other variables
	Interpersonal Competence Scale (ICSt) **rated by target adolescent**	Adolescent's interpersonal competence	19icssfl.ins.pdf	19icssfl code book.pdf	**icssfl1.sps** - sets up SPSS database, missing values are declared and value labels are defined **icssfl2.sps** -computes frequencies *icssflScores.sps – computes scores*	**icssfl** - includes all variables in codebook and value labels *icssflScores.sav – ICSt scores*	INCLUDED variables: 8 summary scores EXCLUDED variables: all other variables
	Social Desirability Scale (SDS)	Social desirability	20sdfl instrument.pdf	20sdfl code book.pdf	**sdfl1.sps** - sets up SPSS database, missing values are declared and value labels are defined **sdfl2.sps** - runs frequencies, reverse recodes some variables and computes summary measure of social desirability	**sdfl** includes all variables in codebook, some reverse-coded variables, and a summary measure, includes some variable labels and value labels	INCLUDED variable: 1 summary score EXCLUDED variables: all other variables
	Report of Friends' Delinquency by target adolescent (RFD) a modified version of the SRD	Friends' delinquent and criminal behaviors	31delffl.ins.pdf	31delffl code book.pdf	**delffl1.sps** – sets up SPSS database, declares missing values and defines value labels **delffl2.sps** - runs frequencies and defines variable labels and creates summary variable	**delffl** - includes all variables in codebook plus summary variable, includes variable labels and value labels	INCLUDED variable: 1 summary score EXCLUDED variables: all other variables

Respondent	Measure Name	Construct Measured	Instrument File(s)	Codebook File(s)	Program File(s)	Data File(s)	Summary Data File DS_117
Teacher is the respondent.	**Achenbach Teacher Report Form** (TRF)	Problem behavior	Achenbach's TRF behavior rating form (not provided)	Achenbach's Cross-Informant Program for coding (not provided)	**trffl1.sps** - sets up SPSS database, missing values are declared and variable labels and value labels are defined	**trffl** - Teacher Report Form for Achenbach behavior rating, includes variable labels, includes total scores, t-scores, clinical scores for subscales and broadband categories such as total problems, internalizing and externalizing scales	EXCLUDED variables: coder, gender, age INCLUDED variables: all other variables, which are summary scores
Friend is the respondent.	**Social Network Interview of target adolescent's friend** (SNIf)	Peer network composition and characteristics	24snffl.ins.pdf	24snffl code book.pdf, 00codshe.fl.pdf	**snffl1.sas** – creates database for network variables separately for each individual target adolescent's friend, and establishes missing data. *WvarsFilePrepSnfflab.sps – calculates a count of friends and captures summary variables*	**snfflab** – Note: There are variable lines of data for each case, reflecting the number of network members in each adolescent friend's network with each line representing the characteristics of a single network member. 75 individual data files are in a separate folder labeled snffl. Each file is named snffl### where ### is the Subject ID). These individual data files can be used to create summary measures for each individual friend's network. *snfflabSummary.sav – includes summary variables and a count of friends*	INCLUDED variables: 17 summary variables EXCLUDED variables: all other variables

Respondent	Measure Name	Construct Measured	Instrument File(s)	Codebook File(s)	Program File(s)	Data File(s)	Summary Data File DS_117
Friend is the respondent.	**Interpersonal Competence of Target Adolescent rated by friend** (ICSf)	Adolescent's interpersonal competence	25icsffl.ins.pdf	25icsffl code book.pdf	**icsffl1.sps** - sets up SPSS database, missing values are declared and value labels are defined **icsffl2.sps** - runs frequencies *icsfflScores.sps – computes scores*	**icsffl** - includes all variables in codebook and value labels *icsgflScores.sav - ICSf scores*	INCLUDED variables: 8 summary scores EXCLUDED variables: all other variables
	Self Report of Delinquency by friend (SRDf)	Friend's delinquent and criminal behaviors	26srdffl.ins.pdf	26srdffl code book.pdf	**srdffl1.sps** – sets up SPSS database, missing values are declared and value labels are defined **srdffl2.sps** - runs frequencies	**srdffl** - includes all variables in codebook plus summary measure of friend's delinquency, includes value labels	INCLUDED variable:1 summary score EXCLUDED variables: all other variables
Multiple respondents.	N/A	Demographics	N/A	N/A	**var1to7.sps** – Creates file containing 3rd - 7th demographic variables from all files and makes necessary corrections	**var 1 to 7 demographics**	EXCLUDED variables: all variables
	N/A	Summary of all data collected	multiple	NDACAN User 's Guide and Codebook	***MatchFilesCreateDS_117.sps*** – *Merges all data files and includes variables as described in the working file column of this chart* ***LabelDS_117.sps*** – *Labels all variables, adds some value labels* ***FinalEditDS_117.sps*** - *Corrects errors, adds labels, formats decimals*	*DS_117.sav- File of demographics, summary variables and scores*	INCLUDED: entire file MATCHED BY: sid OTHER MATCHED VARIABLES ACROSS ALL FILES: cid, abcon, abusedk

_____

Data File Notes

The study reported here is a follow-up of an earlier study by the same investigators, Social Relationships of Physically Abused Schoolchildren, already submitted to the Archives. The original study is dataset #112 at NDACAN. For more information on the first study, see the Final Report for this study (dataset #117) or obtain the dataset #112 from NDACAN.

SOCCOGFL, found as the header on each page, stands for social cognition follow-up. Social cognition was a strong focus of the grant from NIMH that funded the first of the two studies (DS_112).

The following conventions were generally applied when naming variables and files in contributor original works: fl = follow-up (the contributors' name for the study), tadol = target adolescent, g = guardian, s = self and refers to the target adolescent, t = teacher, and f = friend.
Some of the file names of the codebooks and instruments are preceded by a number which generally reflects the order in which the instruments were administered to subjects. Names, descriptions, and explanations of variables in each of the data files are found in the codebooks and programs for the relevant instrument.

Ethnicity of adolescent is to be found in data file demsfl. The variable is named ethnicity recode, and it is based on the adolescent's self-identified ethnicity. The program for it is in the program file, demsfl2. Disregard the ethnic code listed in the codebooks (variable #6) for each instrument and disregard variable #6 (ethnicity) in each of the data files and program files. In DS_117 ethrecode is the only ethnicity variable included. The rationale for classifying children into ethnic groups is based on the children's self-report of their ethnic group membership (see questions in last section of tadol's demographic instrument).

Data file "var 1 to 7 Demographics" is an extra file that details the age and grade of the adolescents and the interview dates for adolescents and guardians.

For assigning Guardians' Occupational Status, the NAM-Powers Index was used, ranging from 0 to 100 with 100 representing the highest status. Occupational status was coded from descriptions of occupation obtained from guardians during the guardian demographic interview. Questions pertaining to adolescent occupation also employed NAM-Powers codes. For more information, see:
Miller, D. C. (1991). *Handbook of Research Design and Social Measurement, 5th ed.* (pp. 341-350)
    Newbury Park, CA: Sage.

The syntax for the creation of derived variables can be found in the NDACAN program files, and in the contributor program files. Look at the Map Connecting Files with Measures to find the correct program file. Neither the contributor derived variables nor the NDACAN derived variables can be found in the contributor codebooks.

The Achenbach measures and codebooks have not been provided. However, data files of summary scores are included for these measures. These scores are included in DS_117.

CODEBOOK: Dataset #117 Variable Information

The Codebook provides the following information: The position of the variable in the data file, variable name, variable label, variable group, variable format, values, value labels, and relevant notes and definitions.

Lists of the variables are also provided, first by position and then alphabetically.

Variable List by Position

Position	Variable Name	Variable Label	Group
1	SID	Family ID	Record Identifier
2	CID	Class ID	Record Identifier
3	ABCON	Abuse or Control subject	Record Identifier
4	ABUSEDK	Abused child or Control child	Record Identifier
5	DEMFL3	GDI Gender	Guardian Demographics Interview
6	DEMFL4	GDI Age	Guardian Demographics Interview
7	DEMFL5	GDI Birth date	Guardian Demographics Interview
8	DEMFL5M	GDI Month of birth	Guardian Demographics Interview
9	DEMFL5D	GDI Day of birth	Guardian Demographics Interview
10	DEMFL5Y	GDI Year of birth	Guardian Demographics Interview
11	DEMFL7	GDI Grade	Guardian Demographics Interview
12	DEMFL10	GDI Informant Relation to tadol	Guardian Demographics Interview
13	DEMFL11	GDI Household member 1 Relation to informant	Guardian Demographics Interview
14	DEMFL12	GDI Household member 1 Relation to tadol	Guardian Demographics Interview
15	DEMFL13	GDI Household member 1 Age in months	Guardian Demographics Interview
16	DEMFL14	GDI Household member 1 Gender	Guardian Demographics Interview
17	DEMFL15	GDI Household member 1 Days/week Contact with tadol	Guardian Demographics Interview
18	DEMFL16	GDI Household member 1 Months in home with tadol	Guardian Demographics Interview
19	DEMFL17	GDI Household member 2 Relation to informant	Guardian Demographics Interview
20	DEMFL18	GDI Household member 2 Relation to tadol	Guardian Demographics Interview
21	DEMFL19	GDI Household member 2 Age in months	Guardian Demographics Interview
22	DEMFL20	GDI Household member 2 Gender	Guardian Demographics Interview
23	DEMFL21	GDI Household member 2 Days/week Contact with tadol	Guardian Demographics Interview
24	DEMFL22	GDI Household member 2 Months in home with tadol	Guardian Demographics Interview
25	DEMFL23	GDI Household member 3 Relation to informant	Guardian Demographics Interview
26	DEMFL24	GDI Household member 3 Relation to tadol	Guardian Demographics Interview
27	DEMFL25	GDI Household member 3 Age in months	Guardian Demographics Interview
28	DEMFL26	GDI Household member 3 Gender	Guardian Demographics Interview
29	DEMFL27	GDI Household member 3 Days/week Contact with tadol	Guardian Demographics Interview

Position	Variable Name	Variable Label	Group
30	DEMFL28	GDI Household member 3 Months in home with tadol	Guardian Demographics Interview
31	DEMFL31	GDI Household member 4 Relation to informant	Guardian Demographics Interview
32	DEMFL32	GDI Household member 4 Relation to tadol	Guardian Demographics Interview
33	DEMFL33	GDI Household member 4 Age in months	Guardian Demographics Interview
34	DEMFL34	GDI Household member 4 Gender	Guardian Demographics Interview
35	DEMFL35	GDI Household member 4 Days/week Contact with tadol	Guardian Demographics Interview
36	DEMFL36	GDI Household member 4 Months in home with tadol	Guardian Demographics Interview
37	DEMFL37	GDI Household member 5 Relation to informant	Guardian Demographics Interview
38	DEMFL38	GDI Household member 5 Relation to tadol	Guardian Demographics Interview
39	DEMFL39	GDI Household member 5 Age in months	Guardian Demographics Interview
40	DEMFL40	GDI Household member 5 Gender	Guardian Demographics Interview
41	DEMFL41	GDI Household member 5 Days/week Contact with tadol	Guardian Demographics Interview
42	DEMFL42	GDI Household member 5 Months in home with tadol	Guardian Demographics Interview
43	DEMFL43	GDI Household member 6 Relation to informant	Guardian Demographics Interview
44	DEMFL44	GDI Household member 6 Relation to tadol	Guardian Demographics Interview
45	DEMFL45	GDI Household member 6 Age in months	Guardian Demographics Interview
46	DEMFL46	GDI Household member 6 Gender	Guardian Demographics Interview
47	DEMFL47	GDI Household member 6 Days/week Contact with tadol	Guardian Demographics Interview
48	DEMFL48	GDI Household member 6 Months in home with tadol	Guardian Demographics Interview
49	DEMFL49	GDI Household member 7 Relation to informant	Guardian Demographics Interview
50	DEMFL50	GDI Household member 7 Relation to tadol	Guardian Demographics Interview
51	DEMFL51	GDI Household member 7 Age in months	Guardian Demographics Interview
52	DEMFL52	GDI Household member 7 Gender	Guardian Demographics Interview
53	DEMFL53	GDI Household member 7 Days/week Contact with tadol	Guardian Demographics Interview
