CODE BOOK

Revised September 10, 2024

TABLE OF CONTENTS

INTRODUCTION

The Code Book for the Adoption and Foster Care Analysis and Reporting System (AFCARS) is produced by the National Data Archive on Child Abuse and Neglect (NDACAN). NDACAN is funded by the Children's Bureau, Administration on Children, Youth and Families, Administration for Children and Families, Department of Health and Human Services.

To assist individuals, this code book includes information on the NDACAN distributed version of the AFCARS Foster Care (FC) Data File(s).

Terminology

This section defines terms used in the Table of Contents and throughout the code book.

Variable Number: The number assigned for each item of information in the NDACAN file, in the order they appear in the data file. There are 107 variables in the code book.

AFCARS Element: These are the elements States are required to submit according to 45 CFR1355.40. There are 66 required foster care elements.

Derived Variable: These are items added by NDACAN that combine or use AFCARS elements. They are intended to make the data easier to work with, to reduce the workload on the user, and to assure consistent definition of terms across users of the data.

AFCARS Foster Care Variables

There are two tables that list the contents of the file, headed "AFCARS Foster Care Variables." One is arranged by the order of the variables in the data; the other alphabetically by variable name. Both lists have the same columns.

Column "Var#" is the order of the variable in the data.

Column "Regulation" has the location of the variable in the federal regulation at 45 CFR 1355. The specific elements required by AFCARS are defined in Appendix A of CFR 1355.

Column "Element#" has the element number that the Children's Bureau has assigned to the elements.

Codebook Entries

Each codebook entry has the following information:

- **Variable Order**: The order of the variable in the dataset

- **Name**: The variable name

- **Label**: The variable label as it appears in the SPSS, SAS, and Stata data file

- **Definition**: The definition of the variable (from 45 CFR 1355, or by NDACAN if derived)

- **Data Type**: Text, numeric, or date.

- **Source**: The source may be the element ID in the regulations or in the *Guide to an AFCARS Assessment Review* (https://www.acf.hhs.gov/cb/policy-guidance/guide-afcars-assessment-review). Variables labeled "Derived" are those calculated by NDACAN from the original elements. Derived elements are intended to make working with the data easier for researchers.

- **Guidance**: This is the guidance to States on how to work with that element; this comes from the *Guide*.

#45   Most Recent Case Plan Goal

Name: CaseGoal

Label: Most Recent Case Plan Goal

Definition: The most recent case plan goal for the child based on the latest review of the child's case plan—whether a court review or an administrative review:

1. **Reunify with Parents or Principal Caretaker(s)**—The goal is to keep the child in foster care for a limited time to enable the agency to work with the family with whom the child had been living prior to entering foster care in order to reestablish a stable family environment.

2. **Live with Other Relatives**—The goal is to have the child live permanently with a relative or relatives other than the ones from whom the child was removed. This could include guardianship by a relative(s).

3. **Adoption**—The goal is to facilitate the child's adoption by relatives, foster parents or other unrelated individuals.

4. **Long Term Foster Care**—Because of specific factors or conditions, it is not appropriate or possible to return the child home or place her or him for adoption, and the goal is to maintain the child in a long-term foster care placement.

5. **Emancipation**—Because of specific factors or conditions, it is not appropriate or possible to return the child home, have a child live permanently with a relative or have the child be adopted; therefore, the goal is to maintain the child in a foster care setting until the child reaches the age of majority.

6. **Guardianship**—The goal is to facilitate the child's placement with an agency or unrelated caretaker, with whom he or she was not living prior to entering foster care, and whom a court of competent jurisdiction has designated as legal guardian.

7. **Case Plan Goal Not Yet Established**—No case plan goal has yet been established other than the care and protection of the child.

59

Guidance: "Reunification" includes the return of the child to a non-custodial parent.

If the youth will be in foster care until the age of 18 and no other goal is currently applicable, and the youth is at least 14 years of age, and has a permanent connection with an adult, this is reported as a goal of "emancipation." If there is no adult with a permanent connection to the child, this is reported as a goal of "long-term foster care."

If there is no case plan goal documented within 60 days of removal, this element is reported as blank.

Goals for relatives to obtain guardianship are reported as "live with other relative(s)."

#105   State Foster Care ID

Name: StFCID

Label: State Foster Care ID

Definition: The purpose of this variable is to aid in linking files by providing one consistently-named variable across NDACAN administrative datasets. The StFCID is the combination of the variables "St" (the state 2-character code) and "RecNumbr", the encrypted child's AFCARS identifier. This same variable can be found in the NYTD Outcomes File, the AFCARS Foster Care File, and the NCANDS Child File.

   This variable is also the easiest way to distinguish individual children, since a *RecNumbr* can possibly duplicated in some other state, one would have to include *St* along with *RecNumbr* in any process that involves distinct children (e.g., counting, selecting, grouping, etc).
