2010 ADOPTION STATE FOOTNOTES

States are encouraged, but not required, to provide explanatory footnotes along with their data submissions. The footnotes allow states to provide additional information they consider necessary for proper interpretation of their data. The footnotes may include such information as:

- general characteristics of the state's Adoption system
- characteristics of the population, including whether certain types of placements are included
- state definitions that differ from federal AFCARS definitions.

Footnotes for the 2010 versions of the Adoption data follow, sorted by element number and state. General state footnotes that are not specific to an element or period are given an element number of 00.

NDACAN strongly recommends that users review the 2010 footnotes that follow before attempting to analyze the AFCARS Adoption data.
