

WELCOME  
TO THE  
NDACAN  
SUMMER  
TRAINING  
SERIES!

- The session will begin at 12pm EST.
- Please turn video off and mute the line.
- This session is being recorded.
- See ZOOM Help Center for connection issues:  
<https://support.zoom.us/hc/en-us>
- If issues persist and solutions cannot be found through Zoom, contact Andres Arroyo at [aa17@cornell.edu](mailto:aa17@cornell.edu).

# NDACAN SUMMER TRAINING SERIES

National Data Archive on Child Abuse and Neglect  
Bronfenbrenner Center for Translational Research  
Cornell University

# Children's Bureau

An Office of the Administration for Children & Families

## NEW HORIZONS FOR CHILD WELFARE DATA

# NDACAN SUMMER TRAINING SERIES SCHEDULE

- July 1, 2020 - Introduction to NDACAN
- July 8, 2020 - Historical Data
- **July 15, 2020 - Research Example using Historical Data**
- July 22, 2020 - Administrative Data (NCANDS, AFCARS, NYTD)
- July 29, 2020 - Linking Administrative Data in SPSS
- August 5, 2020 - Research Example using Linked Administrative Data

# SESSION AGENDA

- Example of research project using historical data

# CORRELATES OF FOSTER CARE CASELOADS IN THE UNITED STATES, 1982-2018

# FAMILY INSTABILITY AND SOCIAL FORCES

1. What macro-level factors explain children's risk of substitute care?
  - Can they inform child welfare policy? Other policies with child welfare implications?
  - Can they help predict child welfare outcomes?
2. Does the importance of various factors change over time?
  - How much can we rely on prior studies? How often should we update them?

## PRIOR RESEARCH

- Welfare generosity
  - Paxson and Waldfogel (2002, 2003), Swann and Sylvester (2006)
- Female incarceration
  - Swann and Sylvester (2006)
- Violent crime arrests
  - Swann and Sylvester (2006)

# DATA AND METHODS

## RESEARCH DESIGN

- Time-series cross-sectional data
  - Unit of analysis is state–year
- Fixed-effects weighted-least-squares log-log model

$$\ln(y_{ijt}) = \beta_X \ln(X_{ijt}) + \beta_Z Z_{ijt} + \gamma_i + \theta_{jt} + \varepsilon_{ijt}$$

- Robust to nonlinearity in parameters; coefficients represent elasticities
- Robust under violations of random effects assumptions
- Clustered standard errors at state level
  - Robust to serial autocorrelation

## RESEARCH DESIGN

- Time-dependent effects

$$\ln(y_{ijt}) = \beta_{Wt} \ln(W_{ijt}) + \beta_X \ln(X_{ijt}) + \beta_Z Z_{ijt} + \gamma_i + \theta_{jt} + \varepsilon_{ijt}$$

## OUTCOME DATA: FOSTER CARE

- Voluntary Cooperative Information System (1982–1995)
- Adoption and Foster Care Analysis and Reporting System (1995–2018)

## EXPLANATORY DATA: MACRO-LEVEL FACTORS

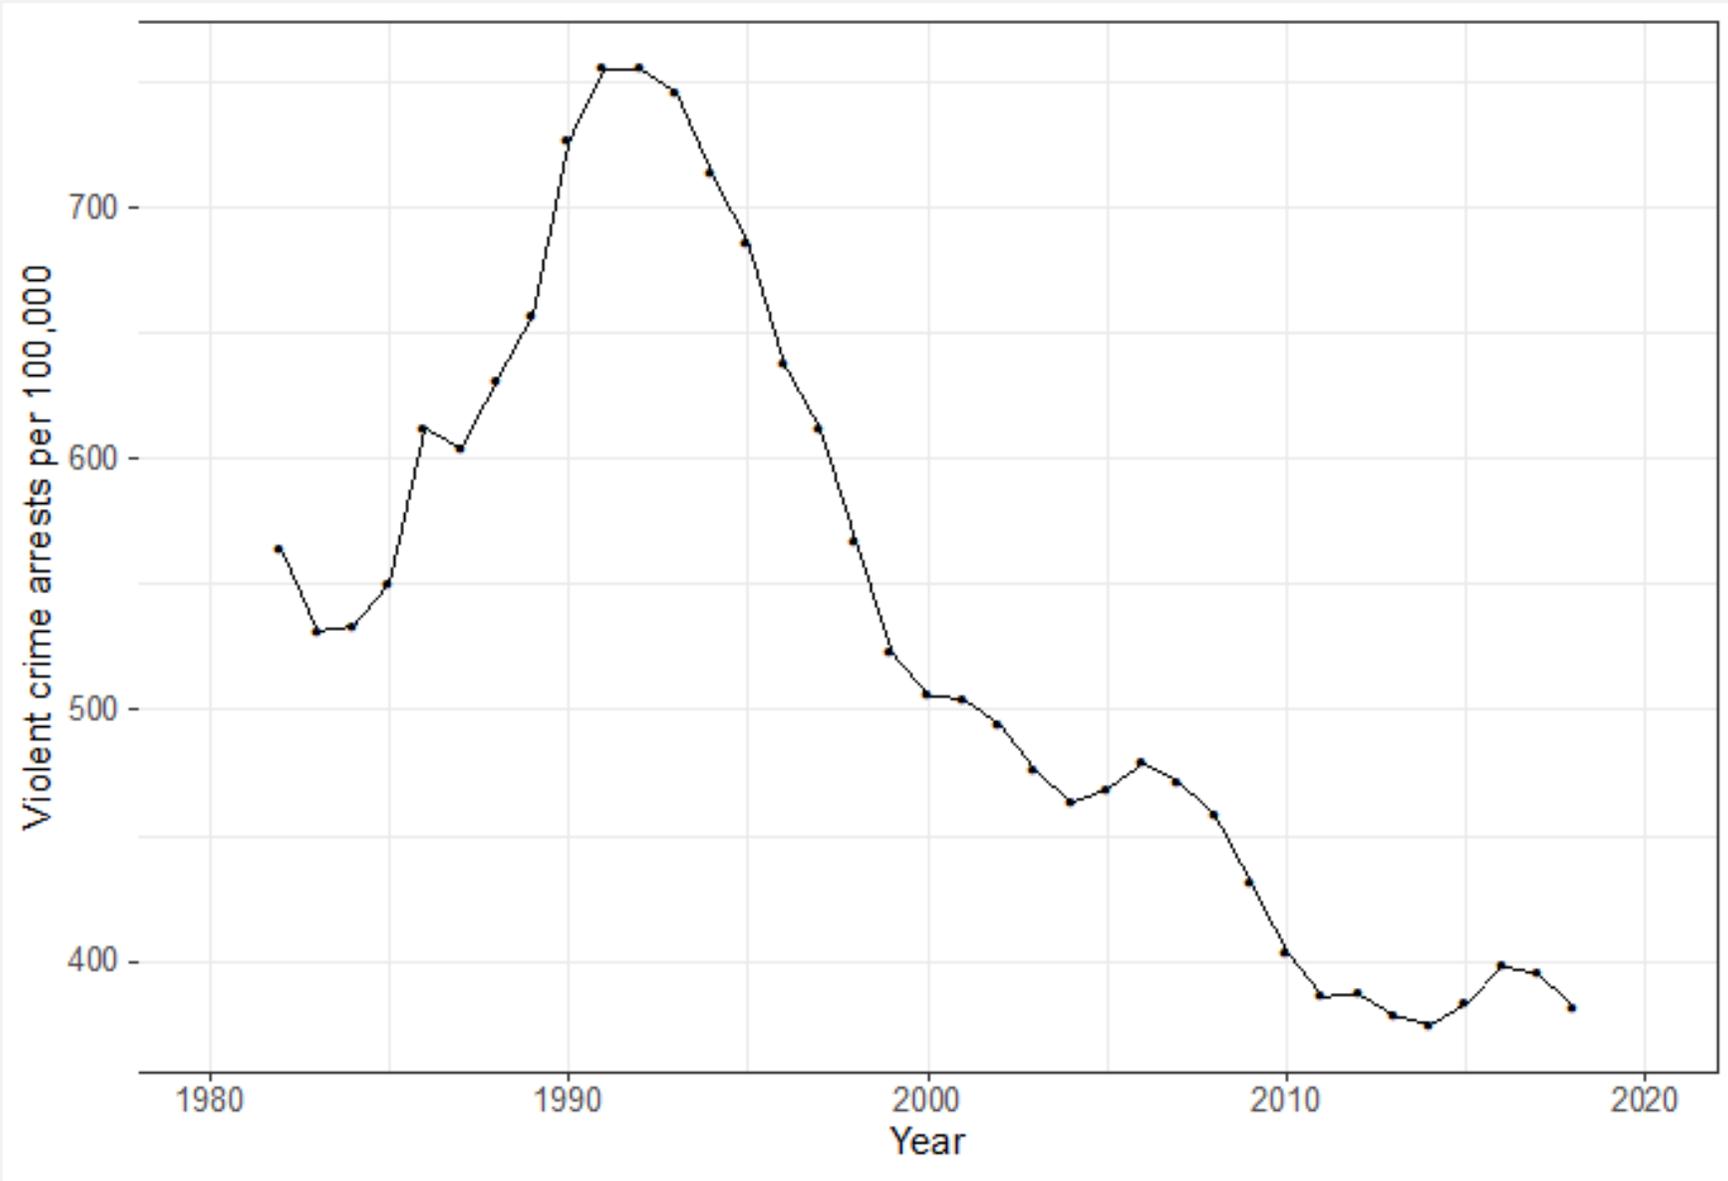

- Denominators and racial composition: U.S. Census Bureau intercensal estimates via SEER
- Violent crime rates: FBI via Uniform Crime Reporting
- Imprisonment rates: National Prisoner Statistics via BJS
- Welfare generosity, unemployment, minimum wage, poverty rate: University of Kentucky Center for Poverty Research
- State government partisan control: National Council of State Legislatures

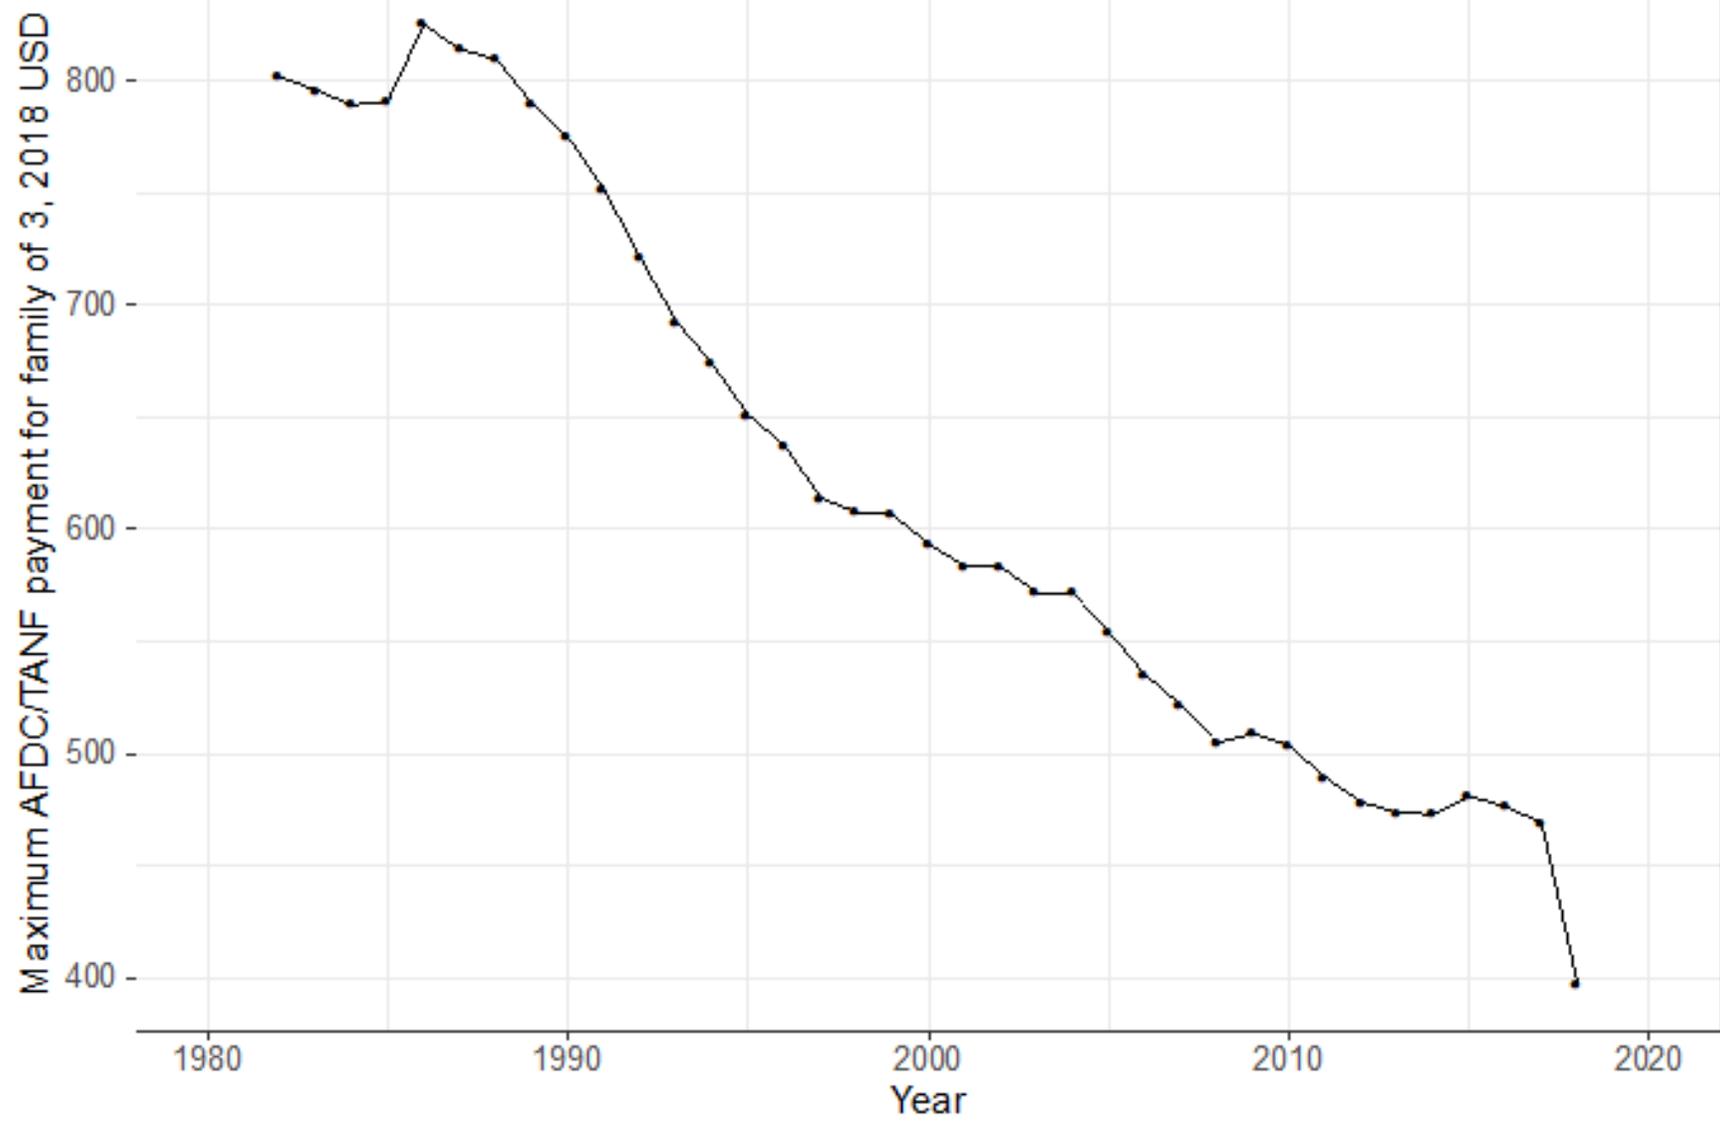

## IMPUTATION OF MISSING DATA

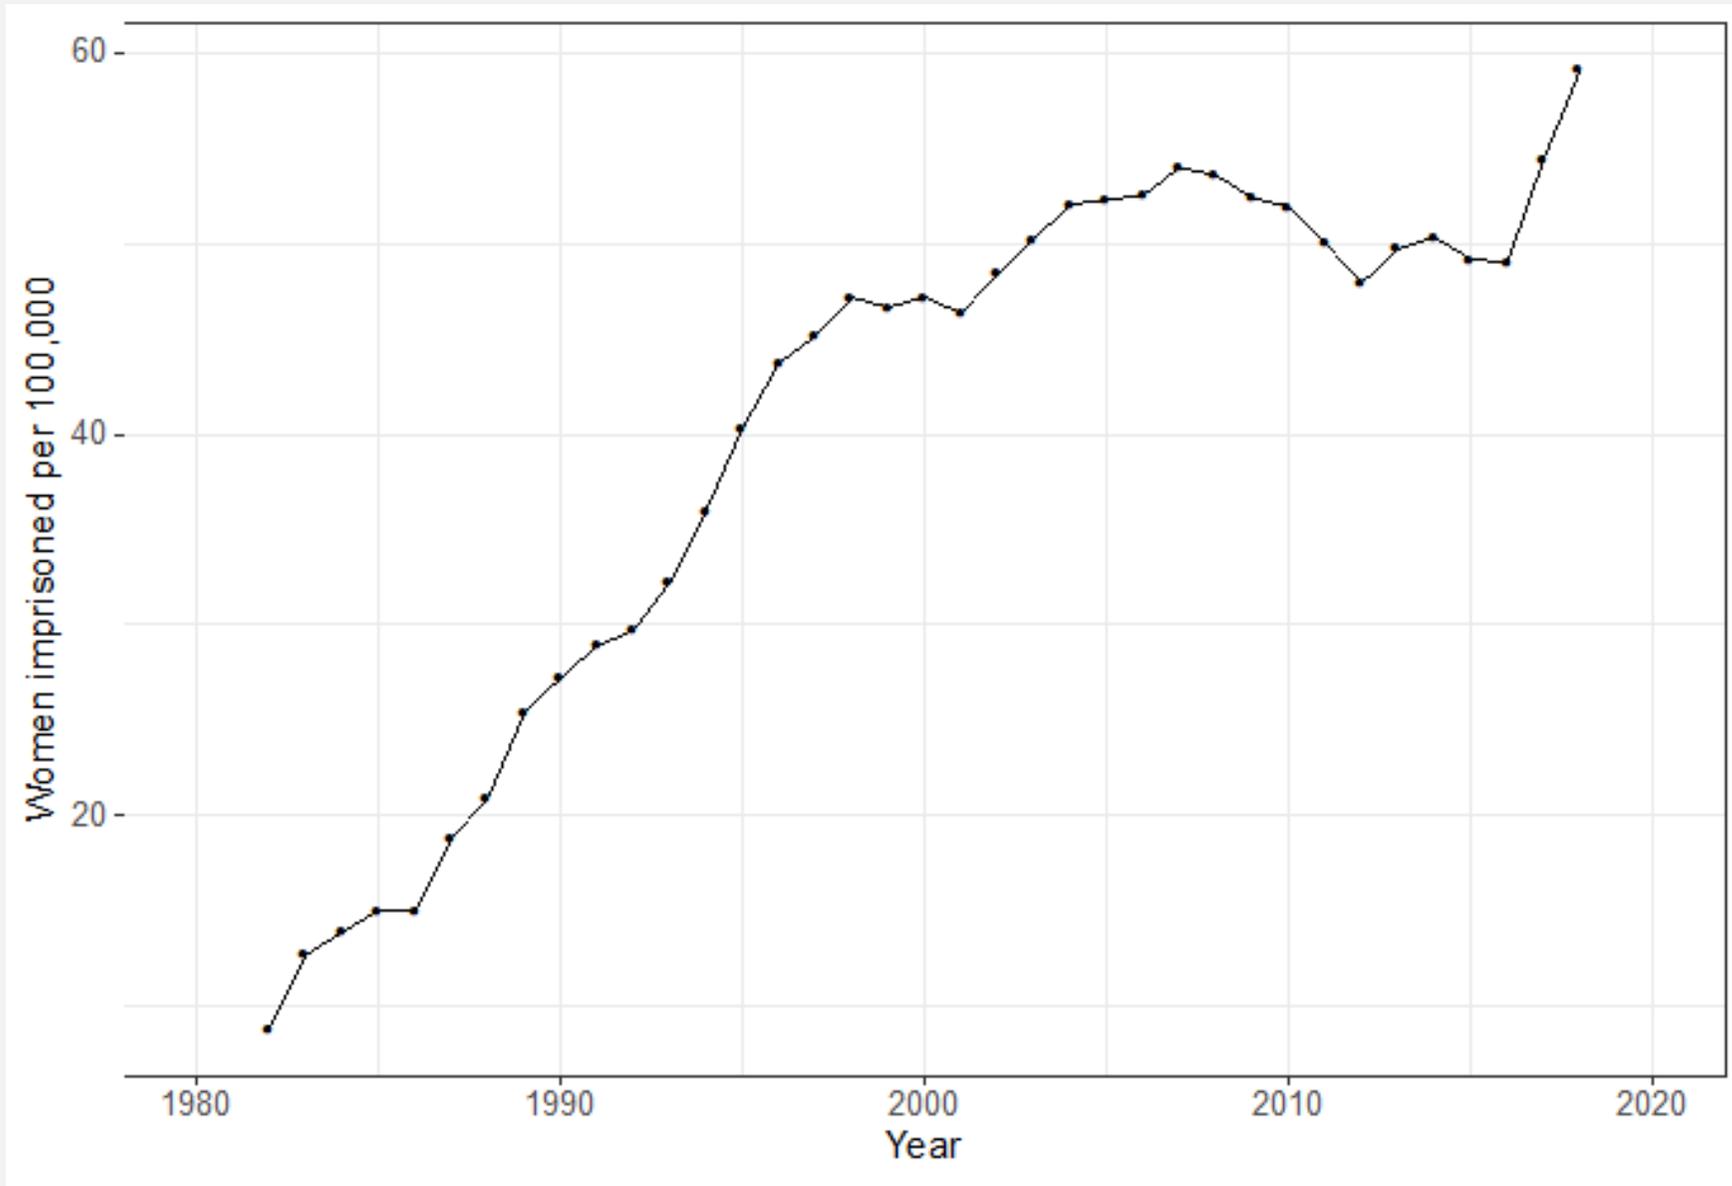

- Small amount of outcome and explanatory data are missing (<10%)
- Assumed missing at random (MAR)
- Multiple imputation by chained equations (MICE)
  - 10 imputations

# RESULTS

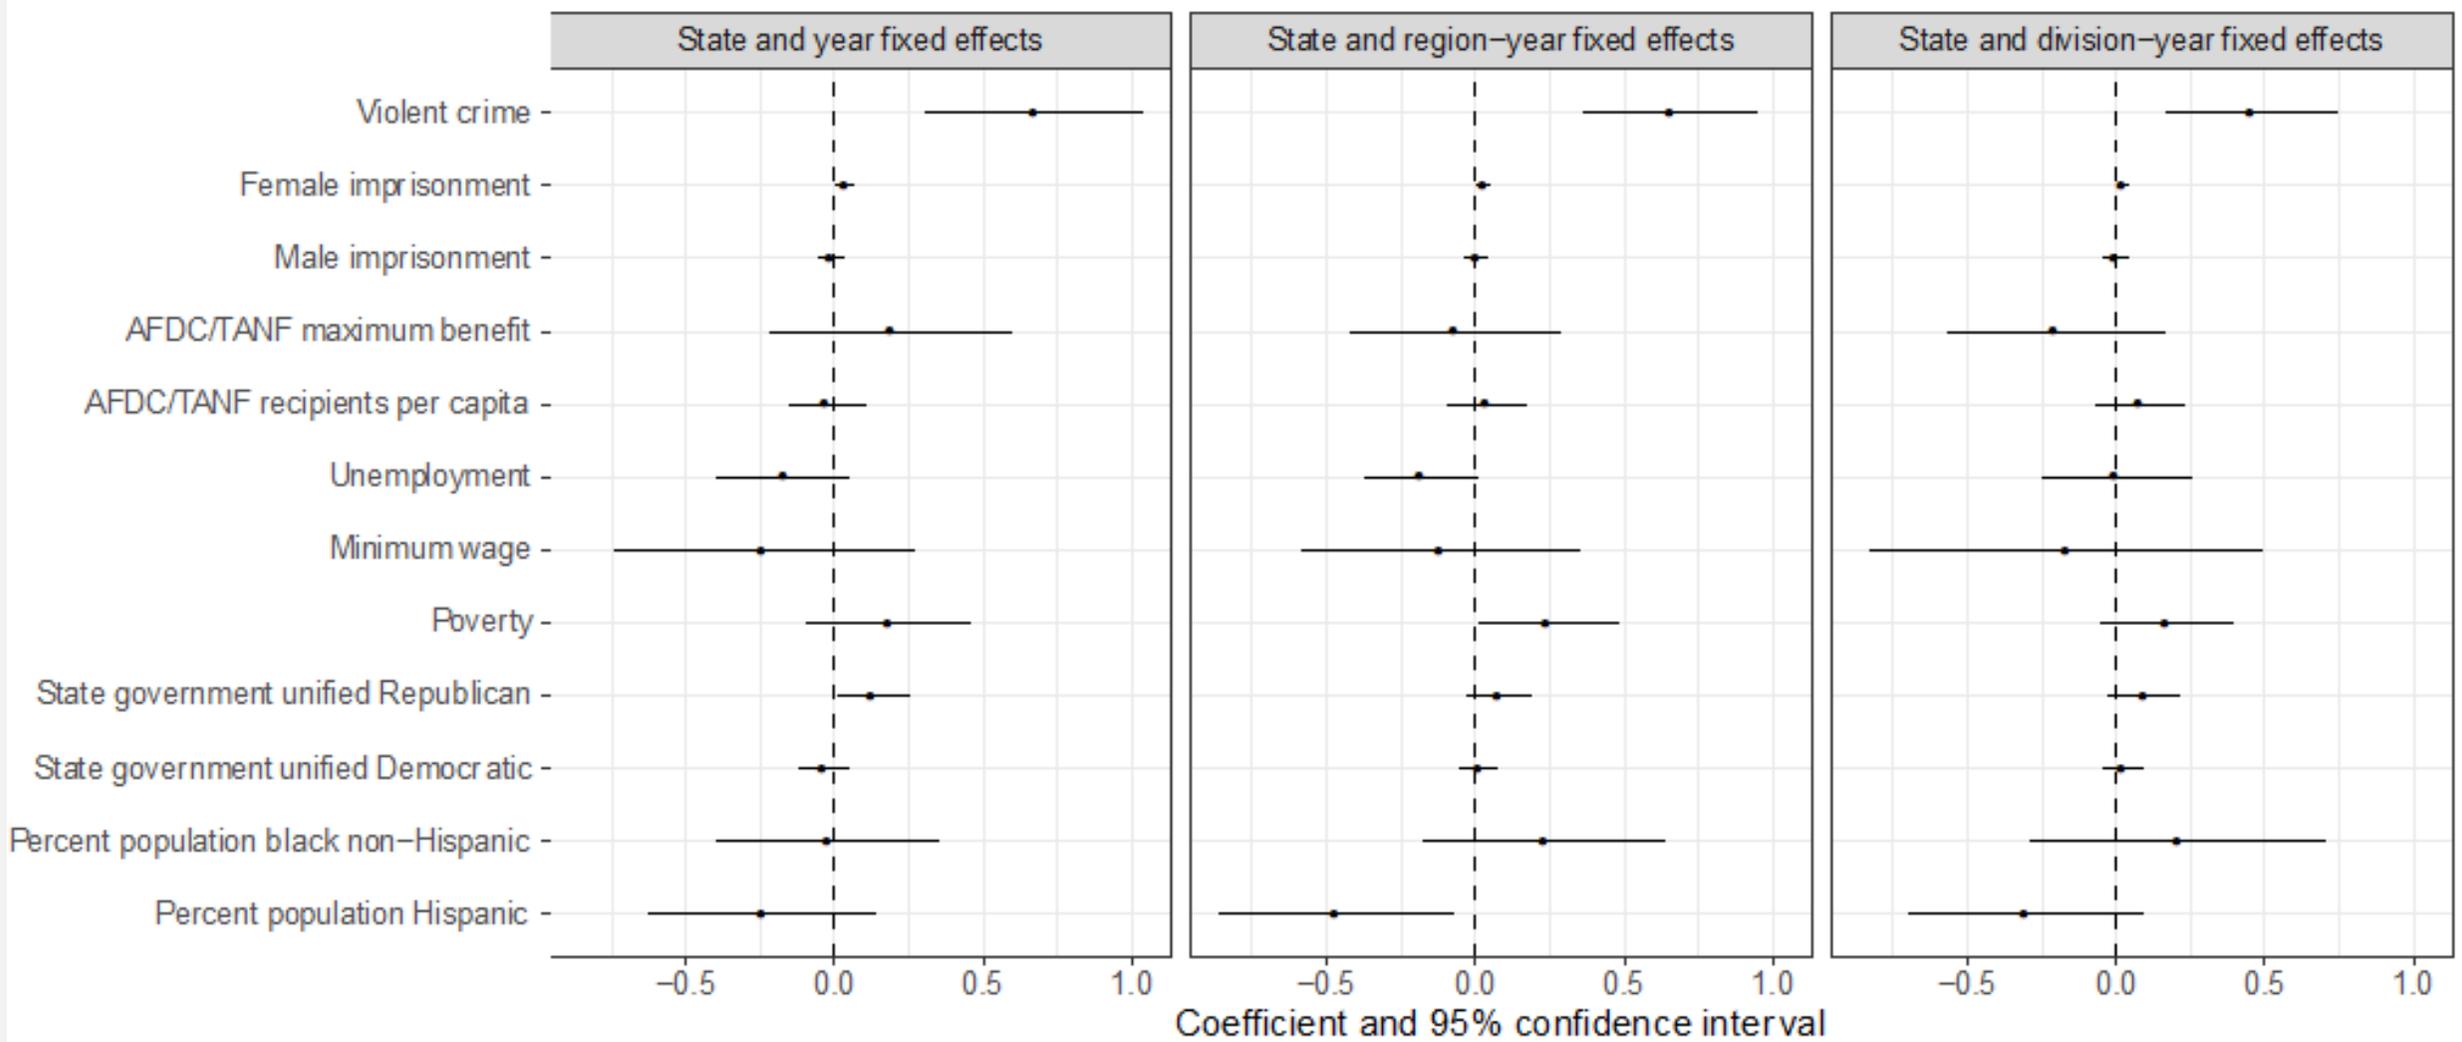

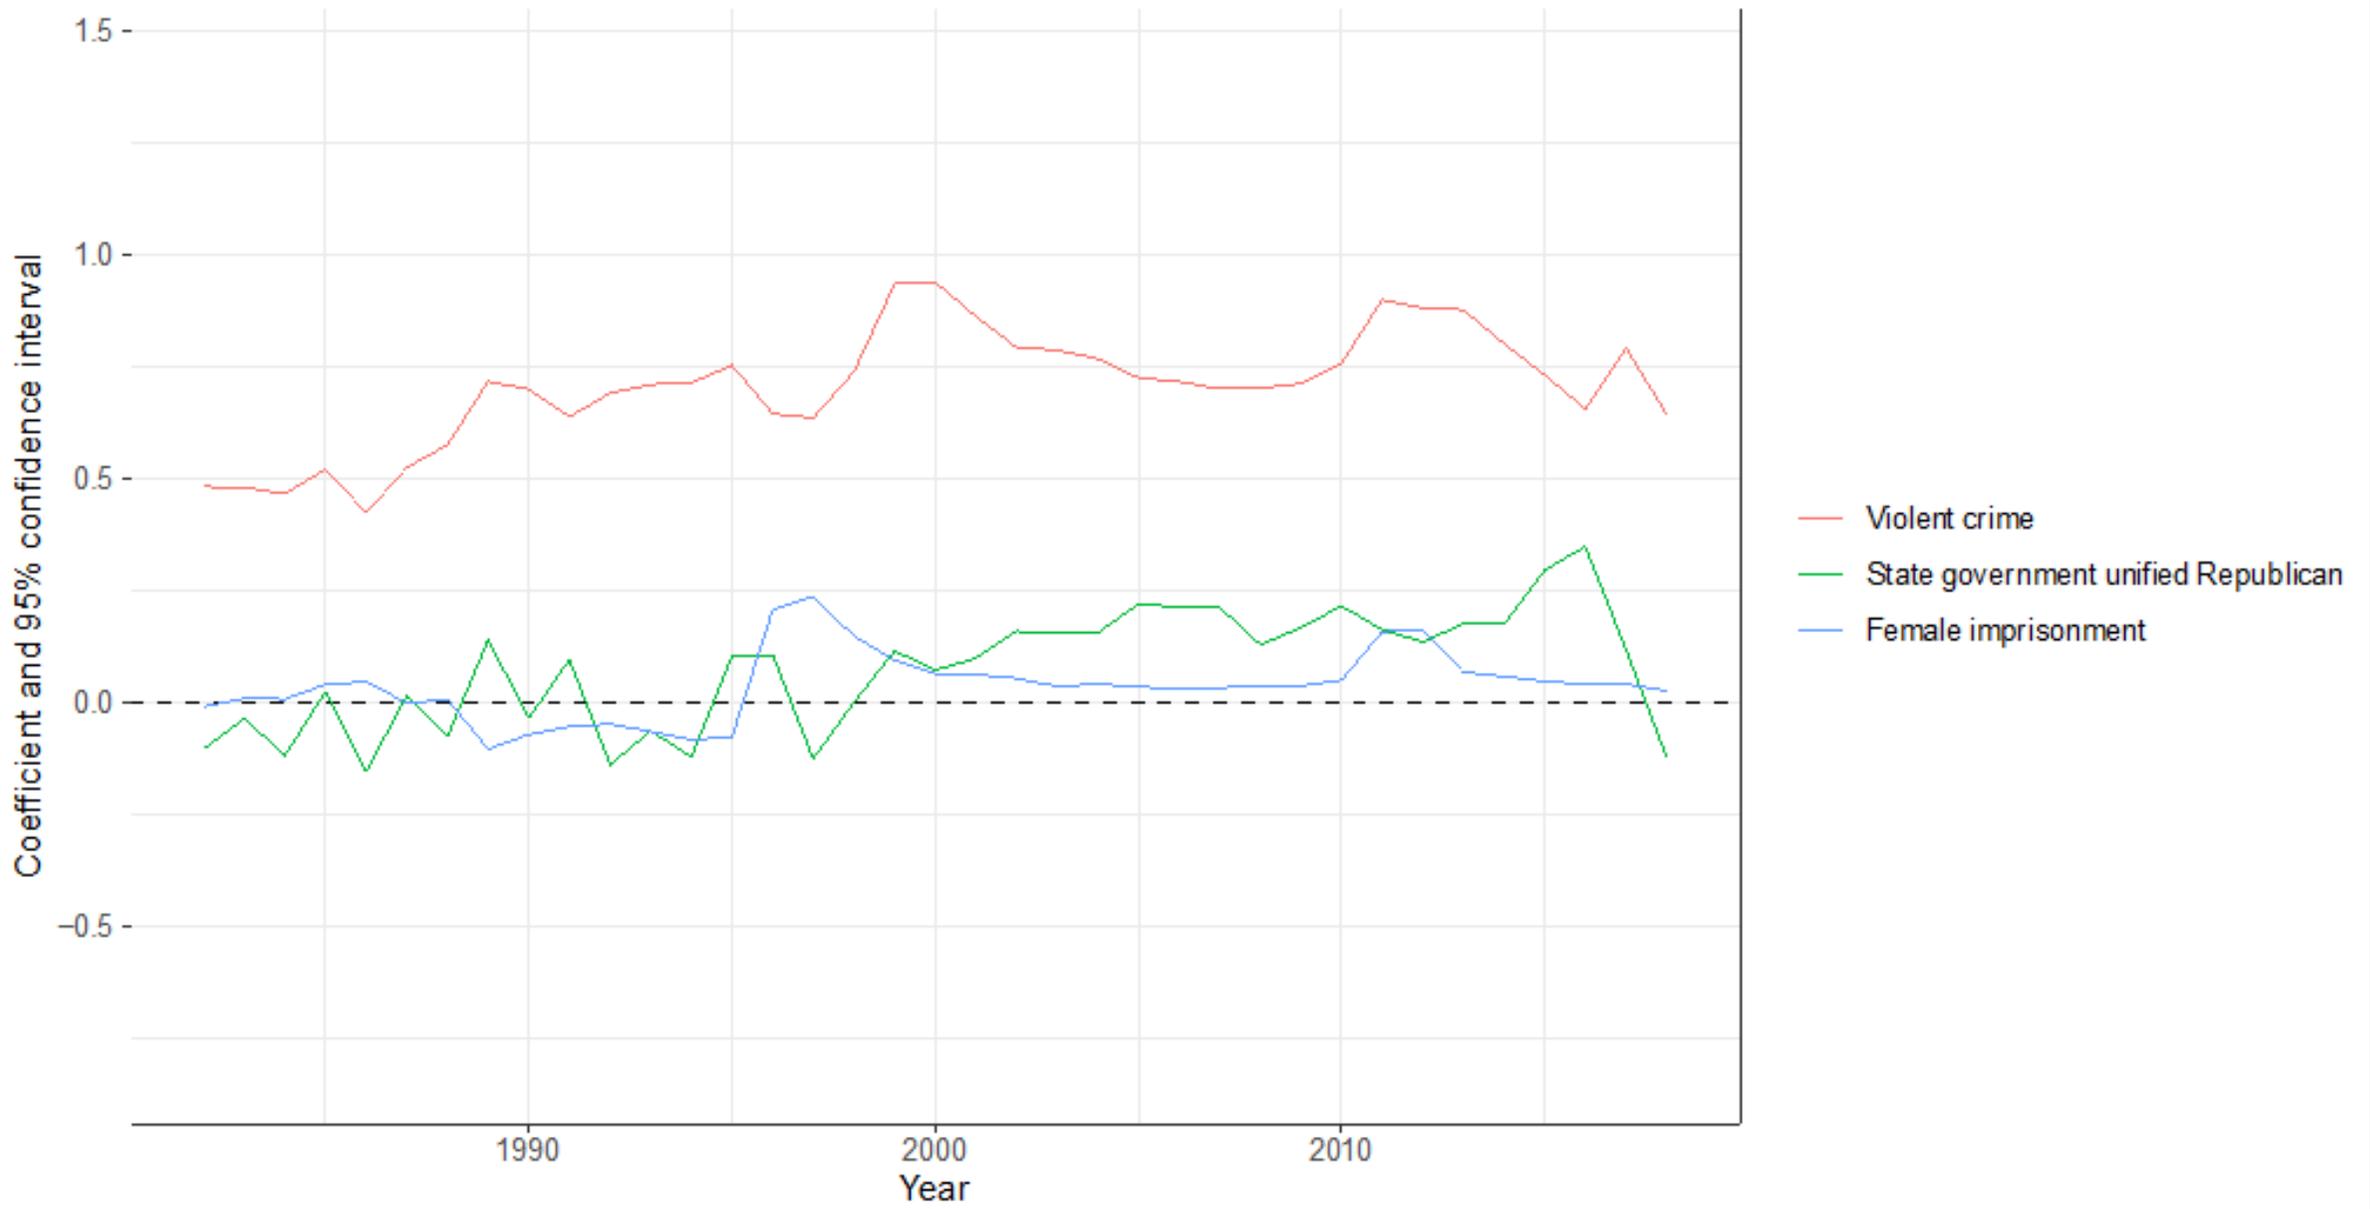

# PERIOD ELASTICITIES

# CONCLUSIONS

## INTERPRETATION OF RESULTS

- Violent crime as a proxy
  - Drug use, social control, etc.
- The importance of unobservables
  - State and year intercepts explain a large proportion of observed variance in outcomes

# CONCLUSIONS

- Historical research is strengthened by attention not only to changing levels but also to changing associations
- Time-dependent effects suggest research needs updating to have valid policy implications

## FUTURE RESEARCH

- Clarification of interpretation of measures and associations
  - Additional covariates
  - Stocks vs. inflows
- Extension of time series
- Robustness to related outcomes
  - Investigations, substantiations of abuse and neglect

# QUESTIONS?

ALEX ROEHRKASSE  
POSTDOCTORAL ASSOCIATE

AFR66@CORNELL.EDU

## NEXT WEEK...

- July 22, 2020
- Presenters:
  - Clayton Covington & Erin McCauley
- Topic:
  - Administrative data
